Q.18 Write a JavaScript program to change background color after 5 seconds of page load.

Code:-

```
<!DOCTYPE html>
<html>
<head>
  <title>Change Background</title>
</head>
<body>

<h2>Wait 5 seconds...</h2>

<script>
  setTimeout(() => {
    document.body.style.backgroundColor = "lightgreen";
  }, 5000);
</script>

</body>
</html>
```

Output:-

Q.19 Write a JavaScript program to dynamically bold, italic and underline words and phrases based on user actions.

Code:-

```
<!DOCTYPE html>
<html>
<head>
  <title>Text Formatter</title>
</head>
<body>

  <h2>Text Formatter</h2>

  <!-- Text Area -->
  <p id="text">
    Select any word or phrase from this text and click a button to style it.
  </p>

  <!-- Buttons -->
 <button onclick="makeBold()">Bold</button>
  <button onclick="makeItalic()">Italic</button>
  <button onclick="makeUnderline()">Underline</button>

  <script>
    function formatText(tag) {
      let selection = window.getSelection();
      let selectedText = selection.toString();

      if (!selectedText) {
        alert("Please select some text first!");
        return;
      }

      let span = document.createElement(tag);
      span.textContent = selectedText;

      let range = selection.getRangeAt(0);
      range.deleteContents();
```

```
        range.insertNode(span);

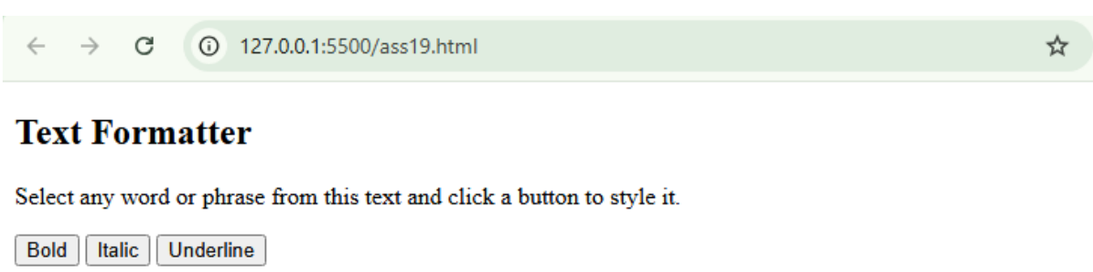
        selection.removeAllRanges();
    }

    function makeBold() {
        formatText("b");
    }

    function makeItalic() {
        formatText("i");
    }

    function makeUnderline() {
        formatText("u");
    }
  </script>
</body>
</html>
```

Output:-



Q.20 Write a JavaScript program to display a hidden div.

Code:-

```
<!DOCTYPE html>
<html>
<head>
  <title>Display Hidden Div using JavaScript</title>
</head>
<body>

<h2>Display Hidden Div</h2>

<button onclick="showDiv()">Show Content</button>

<div id="myDiv" style="display:none; margin-top:10px;">
  This is a hidden div!
</div>

<script>
function showDiv() {
  document.getElementById("myDiv").style.display = "block";
}
</script>

</body>
</html>
```

Output:-

Q.21 Using ideas from the above experiments, try to create a website for your department. 23. Create an e-book having the left side of the page name of the chapters and right side of the page the contents of the chapters clicked on the left side.

Code:-
